The Harvest
Golf Club

[Harvest COVID-19 Registry](#)

Being five days into our recent provincial order requiring proof of vaccination to access Masa's Grill, I would like to take this opportunity to sincerely thank HGC members who have been at Masa's Grill since Monday. We sincerely appreciate the cooperation and patience during this important yet difficult rule to navigate under the current circumstances. I would also like to commend our Food and Beverage team for the efforts and diligent in handling this less than ideal situation with professionalism and grace.

Respectfully
Gilles Dufort
General Manager / Executive Professional

6:15 am

September 20th - 26th

6:15 am

September 27th -

October 3rd

Entering the autumn season, some needed on course projects are already underway. Yesterday the sand on hole #2 has been removed from the 3 bunkers on the left hand side of the fairway. The soil composition around the area is clay. Through thaw and freeze cycles over years, rocks have emerged through clay, contaminating the sand that could cause club damage while diminishing playability in the process.

The entire process from start to finish entails removing the contaminated material, now stockpiled on the left side of the second fairway. The next step will be to lay fresh sod at the base of the bunker to create an impermeable base, meaning no future rocks will emerging again. Once the sod has rooted, it will be allowed to die before laying down new sand material (if not laid this season it will be laid early next spring). The contaminated sand material will soon be moved to the right side of the white/blue tee box of hole #6 to be used as subgrade to enlarge the tee surface for the purpose of improving turf condition in season.

In the last week of September, contaminated sand material in the right fairway bunker of hole #1 and the greenside bunker on hole #16 will be removed for same reason. This material will be transported and utilized to enlarge the tee surface of hole #11. Beside improving turf condition in season, extending the tee surface will also provide more yardage variety for hole #11.

As it may take a number of days to complete we respectfully ask for your cooperation so these projects may be completed successfully while climactic conditions permit. In the mean time if you have any questions about the scope of these projects, please do not hesitate to contact me at any time of your choosing.

Respectfully
Gilles Dufort
General Manager / Executive Professional
